

# How a Positive Human Being Emerges from the Source ~ SHINZEN YOUNG

00:00:00 I was wondering where cultivating positive or identifying positive exists within both  
00:00:17 gone.  
00:00:18 Well, the question is, where is positive within both gone?  
00:00:24 It's not. That's sort of the whole point. No positive, no negative. This is as close  
00:00:32 as you get to the non-human as you can get. However, the great parents, so intrinsically,  
00:00:44 there is no love, there is no hate there, intrinsically. But still, that's hitting a  
00:00:52 human being. We're still a human being. And when we get hit by the impersonal, that tends  
00:01:00 to trigger a sense of deep human love. But it's not intrinsic to the impersonal. It's  
00:01:11 intrinsic to the fact that you're still a human being. And touching that, which is,  
00:01:24 as is said, strikes down God and the devil simultaneously. So you would think, well,  
00:01:32 that's a little bit more like the devil than God. Because it's like, where's ethics,  
00:01:42 where's love? But that's the central mystery. When the human touches the non-human, the  
00:01:50 human is nurtured and improved by way of reaction.  
00:01:55 So touching the non-human source is, when you come back, the ripples of love are there?  
00:02:06 That's pretty much it.  
00:02:11 So then the authentic person is in the source, but not in the ripples of love?  
00:02:20 Well, the authentic person is the puppeteer. And the puppet that that invisible hand is  
00:02:37 inserted into very much will be manifesting love and compassion in the world. So it's  
00:02:49 the power source. You can think of it on an analogy of broadcasting. So there's the wattage  
00:03:05 of the station. That's power, that's joules per second. That's the rate at which energy

00:03:16 is going out. However, the wattage is not the only parameter of a radio or TV station.

00:03:28 There's a modulation that goes on, on that wattage that carries a message. It could be

00:03:34 music, it could be, okay, and it can modulate either amplitude or frequency. But the point

00:03:39 is, there's a message that's riding on that energy wave. It's modulated or encoded. But

00:03:49 it's not the energy wave itself. The energy wave is just pure energy. So that's inside

00:03:56 the puppet, is that energy wave. But the surface of the puppet should be unapproachable, abstract,

00:04:09 admirable, helpful human being. That's what I call classical enlightenment, or class C

00:04:20 enlightenment, as opposed to crazy wisdom or other things that people do, where the

00:04:27 surface is not necessarily unapproachable, admirable, helpful, and ordinary human being.

00:04:38 So that's how I look at it. So if somebody is in touch with the source and also in touch

00:04:45 with being beneficial to other human beings, they're going source here, source here,

00:04:53 source here, source here, something like that? Well, you can use different metaphors. You

00:05:01 could use an alternating metaphor, but I sort of like the spatial metaphor of there's space

00:05:10 inside you that's sort of animating you, anima. There's different possible metaphors. So,

00:05:23 yeah, that's one way to think about it.
